**Gateway to hold
open house for new science labs**

RACINE – Gateway Technical College will hold an open house 3 p.m. to 5 p.m. Nov. 10 for its newly remodeled science laboratory, a space which will give students increased access to required science courses and meet the demand caused by strong numbers of students in health career-related programs.

The lab, on the fifth floor of the Technical Building on the Racine Campus, 1001 S. Main St., will allow for more science classes to be held in Racine – helping students who live there as well as others district wide seeking to enroll in science courses. In the past, physics was the only general science course available at Racine Campus.

They now have the opportunity to take classes such as chemistry, biology, anatomy and physiology.

Johnson Diversey donated equipment and resources to the lab. Parking for the event will be available on the Lake Michigan side of the campus. To access the fifth floor lab, take the elevator just inside the entrance to the Technical Building.

Gateway Technical College collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the challenging needs of students, employers and communities.
