**Gateway Amateur Radio club  
to hold demonstration for Field Day**

STURTEVANT – Gateway Technical College's Amateur Radio club, N9GTC, will join other ham radio operators across the nation to demonstrate their emergency communications capabilities noon June 28 to noon June 29 at the field north of the Center for Advanced Technology and Innovation, 2320 Renaissance Blvd.

The weekend event at Gateway is part of a national Field Day event as a finale for the Amateur Radio Week sponsored by the American Radio Relay League (ARRL), the national association for Amateur Radio operators. Using only emergency power supplies, groups across the country will set up emergency stations in parks, shopping malls and schools to demonstrate how Amateur Radio works and the answer any questions from the public.

Gateway's Amateur Radio club invites the public to come and see ham radio's capabilities and learn how they can get their own FCC radio license. The area where they will be set up is on Highway H between Highway 20 and Highway 11, just north of CATI.

Gateway Technical College collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the challenging needs of students, employers and communities.
