**Gateway center to host
green cleaning seminar**

Have you looked at what you are dumping down the drain?

The chemicals in cleaning products you use may have a long-term effect on the ecosystem – and a seminar to be held in Gateway’s Center for Sustainable Living will offer advice on how to address that issue. By changing simple practices and products, consumers can save water, improve their waste stream and provide a healthy environment.

“Green Cleaning,” presented by Jeff Neubauer, president of Kranz Inc., will be held 6:30 p.m. to 8 p.m. Feb. 9 at the center located on Gateway’s Kenosha Campus, 3520-30th Ave. Cost is \$10. This is the second of a nine-seminar Future First series focused on ways to make your life more sustainable and “green.”

Those interested can register online through WebAdvisor, www.gtc.edu/webadvisor and select “Professional Development.” For more information, contact Beth Tilley at (262) 741-8518 or tillieye@gtc.edu.

For more information on the Future First series, go to www.gtc.edu/publications/Public/futureFIRST.pdf.

Gateway Technical College collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
