# Gateway Technical College Campus Security

The Racine Campus, 1001 Main St., has four buildings. The iMET Center, 2320 Renaissance Blvd, Sturtevant, WI, is an off-site location for the campus. The campus features 27 Associate Degree options, as well as numerous Advanced Technical Diplomas and certificates.

College practices advise that whenever a campus community member needs assistance with an incident that poses a threat to persons or property, 911 must be utilized to address the immediate need.

The dean of campus affairs serves as the campus administrator responsible for the safety and security of the campus and assures that campus security is maintained to a high standard. The Technical Building houses the office of campus security (East Entrance.) Campus security is staffed by a private security firm. Officers do not have arrest powers and will contact local law enforcement whenever assistance is needed with a situation or criminal act. Campus security has the primary responsibility for security services for all campus buildings including the iMET Center. Security performs the function of patrolling the campus, serving as the designated first responders for medical emergencies, monitoring of campus video security system, the point of contact for the campus community and enforcement of college policies and procedures.

Campus security's relationship with the campus community is vital to a safe and secure campus. The quality of services and response is dependent on an active participation of the community and an on-going effort in providing feedback on the department's efforts. In response, all members of the community should expect to be treated in a courteous and professional manner by the campus security officers.

Please help us improve our security efforts by directing compliments and concerns to the attention of the dean of campus affairs for the campus.

The task of maintaining a safe environment cannot be accomplished without the assistance and cooperation of the entire campus community. Safety is a shared responsibility that involves members of the community and campus security working cooperatively to solve problems and proactively address issues that will reduce the likelihood of crime occurring on our campus. This report provides information about safety and security programs and services available at Gateway Technical College.

Posted later in this report are the crime statistics on the incidents that have occurred within the area defined by The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act ("the Clery Act".) These reported statistics include those received from local municipal police for the public areas immediately adjacent to the campus.

We hope you will find this report valuable. Please review the information carefully. Personal safety is a shared responsibility of the college and its students and visitors. We need your assistance in helping to make our campus a safe environment. If you have any question or suggestions about security at

Gateway Technical College, please feel free to contact your dean of campus affairs at 262-564-3218 or by sending an email to [flynng@gtc.edu](mailto:flynng@gtc.edu).

## The Clery Act

The Campus Security Act requires institutions of higher education to publish an annual report every year that contains three years of campus crime statistics, advises the campus community of certain campus security policies. Additionally, the act defines the requirements of providing the campus community with “timely warnings” of identified crimes that pose an ongoing threat to the campus community, the maintenance of a public crime log of incidents that have been reported to the college and disclose any security agreements with state and/or local law enforcement.

The Gateway Technical College director of security is responsible for the reporting of crime statistics and the preparation of the annual report. Statistics are gathered from campus security reports and local law enforcement agencies (Racine and Sturtevant Police Departmentst.)

We encourage members of the campus community to use this report as a guide for safe practices. It is available on the web at <http://www.gtc.edu>. Annually, each member of the college community receives an email that announces the publication of the report and the link to access the report. If a paper copy of the report is required contact the dean of campus affairs at 262-619-6712, office LIN203 in the Lincoln building or mail to dean of campus affairs, Gateway Technical College, 1001 South Main St., Racine, WI, 53403.

Community members wishing to view the crime log may do so during business hours in the dean of campus affairs office, LIN203, Lincoln Building.

All crimes are defined by the National Incident Reporting System of the Uniform Crime Reporting Program.

## Incident and Crime Reporting

Gateway Technical College utilizes a web based product *Maxient* for reporting campus crimes and incidents. The *Maxient* system allows the campus community 24/7 access to the reporting process. All community members are encouraged to complete a report for any incidences that they may be a victim of or a witness to.

If a reporter wished to remain anonymous they may do so, however, the college requests, if at all possible, that the reported identify themselves. By doing so, the college will be able to obtain any additional information necessary to investigate the incident. The college will make every effort to limit the release the identification of persons reporting incidents, however, total anonymity cannot be guaranteed.

The Clery Act does allow information, received by a college professional counselor in confidence, to not be reported without the reporter's permission. Professional counselors, if and when they deem it appropriate, are encouraged to inform reporters they are counseling of the procedures to report an incident or crime to the college for inclusion in the annual disclosure of crime statistics. A Professional Counselor is defined as: a person whose official responsibilities include providing mental health counseling to members of the institution's community and who is functioning within the scope of her/her license or certification. All reporters who are reporting a crime will be encouraged to report the crime to local law enforcement. College security and administrative personnel will assist any reporter with the process.

## Timely Warning Notification

Gateway Technical College will issue a "timely warning" notice whenever a Clery crime or hazardous situation has been confirmed by the college and is considered to pose a serious or continuing threat to students, employees or property. Timely warnings may be issued for the following crime classifications: aggravated assault, arson, burglary, criminal homicide, motor vehicle theft, robbery and sex offenses. The director of security, dean of campus affairs or member of the executive leadership council will review all reported incidents to determine if there is an on-going threat to the campus community. If it is determined that an incident rises to the "timely warning" level, the college will typically utilize Gateway Technical College's ALERT-ME system to notify the campus community.

Other means of notification may be utilized, as the primary or secondary means, if the activator determines that the distribution of the information will be enhanced by other means.

## ALERT-ME

The ALERT-ME system is an electronic communications system that will transmit "timely warnings" to all active Gateway Technical College students and staff to their college email. The message will also transmit a ribbon message to all college owned computers that are actively log onto the college's informational network and to selected wall mounted *ALERTUS* beacons located throughout college own/operated buildings. Additionally, all persons who have self-enrolled in the ALERT-ME system will receive an email message to their private email account and/or text message via their cell phone. Once an ALERT-ME message has been transmitted supplemental information may be posted to the SAFETY page of the college's website. To enroll in the ALERT-ME system or find additional information check the Security web page of the college's website.

An annual operational test of the ALERT-ME system is conducted on the all staff in-service day that is held in October of each calendar year.

Co-located with the *ALERTUS* beacons are building maps that display the location of building egress routes, location of fire extinguishers, fire alarm pull stations and defibrillators.

In the event of severe weather campus locations have been identified with a wall mounted “flag” sign holder as weather refuge areas.

Emergency procedure “flip-charts” are distributed throughout the buildings. These documents have been created to provide a template for the response to emergency situations. Procedures have been developed to assist in coordinating a response to an emergency situation. Note: The college is not able to anticipate all possible scenarios, as such this document should be utilized as a guide when a situation arises that is not directly covered by the identified procedures.

## Emergency Response Plan

Gateway Technical College has and publishes an Emergency Response Plan (ERP) for the campus. The document is available on the SAFETY web page of the college’s website.

The ERP provides the framework for the college’s response to incidents that occur on campus. The ERP describes the classification of emergencies into Minor, Major and Disaster. When an incident occurs, the college president, or the president’s designee, will determine the classification of the incident and level of the college’s response.

When the ERP is initiated two response teams are activated. The first team will be campus based team that is responsible for directly addressing the incident. The second team is district based and will be responsible for supporting the efforts of the campus based team. All plans have been formulated utilizing the National Incident Management System (NIMS.) By utilizing NIMS the college is positioned to integrate its response with that of the local first responders. Gateway Technical College administrative staff members receive annual ERP training. On-going drills and an annual (minimum) ERP exercise (table top or actual exercise) are conducted to train and test the policies and process that have been established in the ERP. Staff members who have been identified in leadership roles of the ERP have been trained in Incident Command. If a serious incident occurs that causes and immediate threat to the campus local first responders will be called to the campus to handle the response to the incident.

## Evacuation Procedures

Gateway Technical College regularly conducts fire drills requiring evacuation of it facilities. These drills, conducted on a monthly basis, are both announced and unannounced. These drills are used to:

Familiarize community members to the audible and visible evacuation signals and the exit routes available to use in the event of a fire or other situation that may require immediate evacuation;

Evaluate the performance of the employees and the evacuation procedures for effectiveness.

Evacuation is mandatory for all individuals when the fire alarm is sounding. Anyone who fails to evacuate may face disciplinary action. Once a fire alarm sounds, do not assume that a fire alarm is a drill or false alarm. Remain calm and evacuate the facility. Remember to follow the instruction of the emergency responders. If you have any information regarding the alarm, present that information immediately to the responding emergency personnel. While evacuating, remain attentive for dangerous or criminal activity that may be associated with the evacuation notice. If you require assistance with evacuating the building you must notify campus security by calling 2208 or by utilizing the call boxes at the top of the stairwells. Do not re-enter the facility until authorized by a member of the campus facilities department or a public service official.

Gateway Technical College does not have any residential facilities on its campus. As such, the college does not include fire statistics reports in this document.
