

INVEST IN YOU.

Earn Your BA in Management in 18 Months

Program Highlights

Earn your degree in 18 months

A blend of online and in-classroom learning

Experience the advantage of small classes and full-time, dedicated faculty

An integrated program that values experiential learning

36 credits are earned through nine, 8-week course blocks

Convenient, flexible and affordable

Building on your associate degree to earn a BA has never been more achievable.

The new Associates to Bachelors program offered through the Alverno College School of Business is geared specifically to women who currently have – or will soon earn – an associate's degree. Whether you want to be a marketer, human resources professional or business woman building a socially responsible company, Alverno's abilities-based curriculum will prepare you for a demanding, rapidly changing world.

Designed to match your fast-paced life, the 18-month program will help you move up in the business world by building your knowledge and abilities and equipping you with a degree from one of the nation's most distinguished women's colleges.

WHAT YOU NEED TO KNOW:

A Program that Fits Your Busy Schedule

We understand that any educational option must be one that creates job security and advancement opportunities without compromising life at home or on the job, which is why the Associates to Bachelors program offered through Alverno College is ideal for women like you.

The 18-month program integrates the best of online learning with critical, in-classroom instruction to bring you a hybrid program that makes earning your bachelor's degree more achievable and realistic than ever before.

Specifically, credits are earned through nine, 8-week course blocks. By offering one new course every eight weeks, you can focus on one course at-hand rather than juggle multiple courses every semester. And by offering courses that consist of a blend of online learning and in-classroom, evening instruction, you get flexibility while still learning within a network of peers under the guidance of Alverno's world-class, highly accomplished business faculty.

A Learning Style that Models the Real World

The reason Alverno's unique learning curriculum works is that it mirrors the workplace, which doesn't consist of letter grades: A world where learning comes from successfully completing a task versus simply reading about it.

At Alverno, learning encompasses demonstrating what you have learned as you master the content. It's a learning experience that is valued by both students and employers, and is further reflected by Alverno's 92% employment upon graduation rate*.

*Rolling 3 year average. ± 4% margin for error.

In addition, Alverno College was once again recognized for its "strong commitment to teaching" in *U.S. News & World Report's 2013 Best Colleges Guidebook*. In the three-year history of this category, Alverno is the only college in the state to receive the recognition in the Midwest Regional standings each year.

The Best Approach to Meet Your Next Career Move

The 18-month Associates to Bachelors program has two start dates – October and February – each year and is convenient, flexible and affordable.

The curriculum includes:

- Women in Careers & Leadership
- Innovative Business Development
- Global Business Environment & Strategy
- Arts, Culture & Ethics
- Sustainability & Technology in a Changing World
- Informed Decision-Making in Complex Societies
- Marketing, Branding & Customer Relationships
- Financial Analysis & Decision-Making
- Quantitative Methods & Technology Application in Organizations
