8. Download the Mac print driver.
9. Run the downloaded file, and then run the installer.

## Installing PaperCut software to Mac OSX

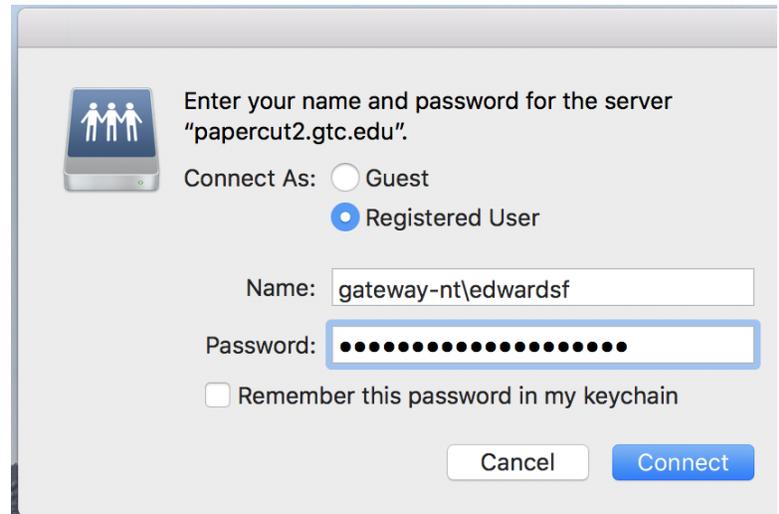

In **Finder**, click on **Go**, then **Connect to Server...**

In the **Server Address:** box type in **smb://papercut2.gtc.edu/pclient**, and click **Connect**

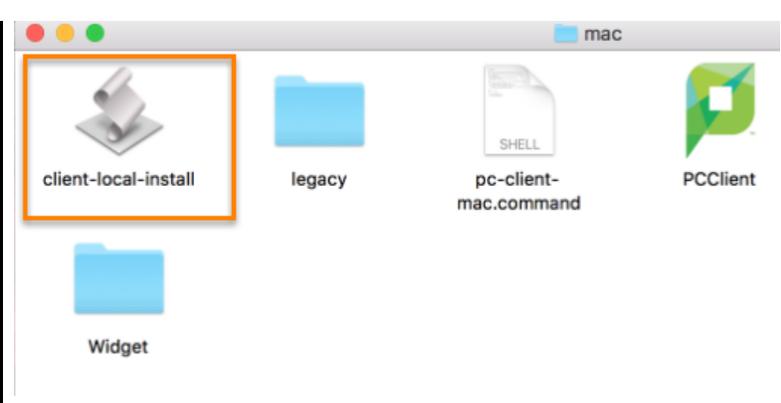

Connect as a **Registered User**, and type in **Gateway-IT\username** for the Name, and the **AD password**. **Note:** **this can be your account or the user's account.**

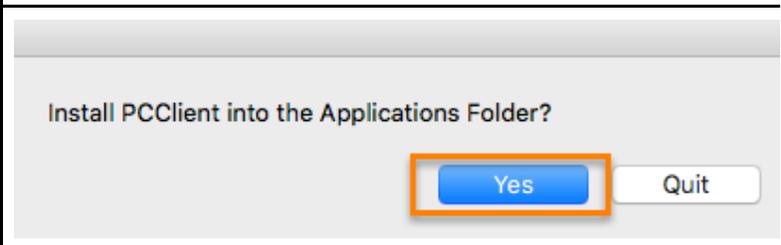

In the **PCClient** window open the **mac** folder, and then run the **client-local-install**

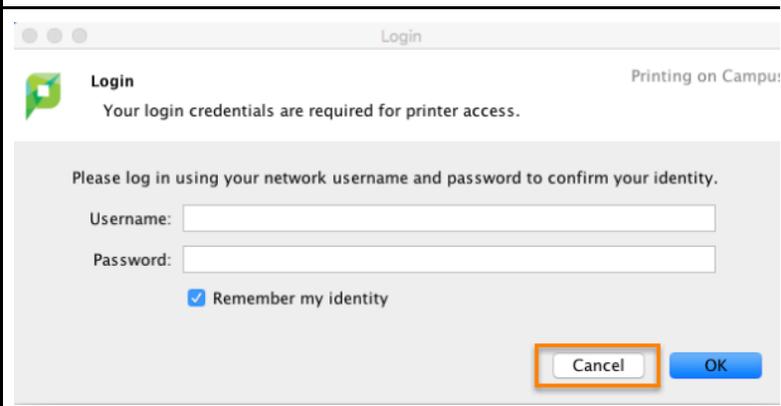

**Note: A box may pop up saying: "client-local-install" is not optimized for your Mac. Click OK**

Select **Yes** to install in the Application Folder

When the PaperCut **“Login”** window opens Click **Cancel**.

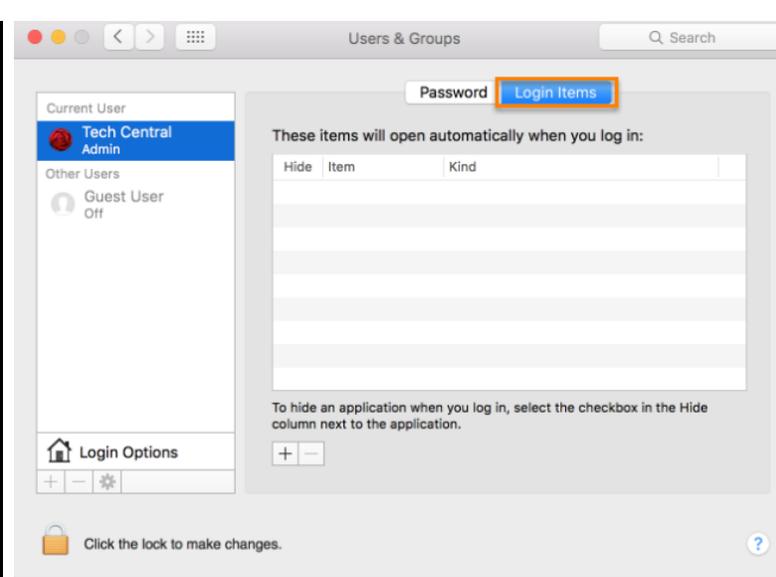

Open **System Preferences**

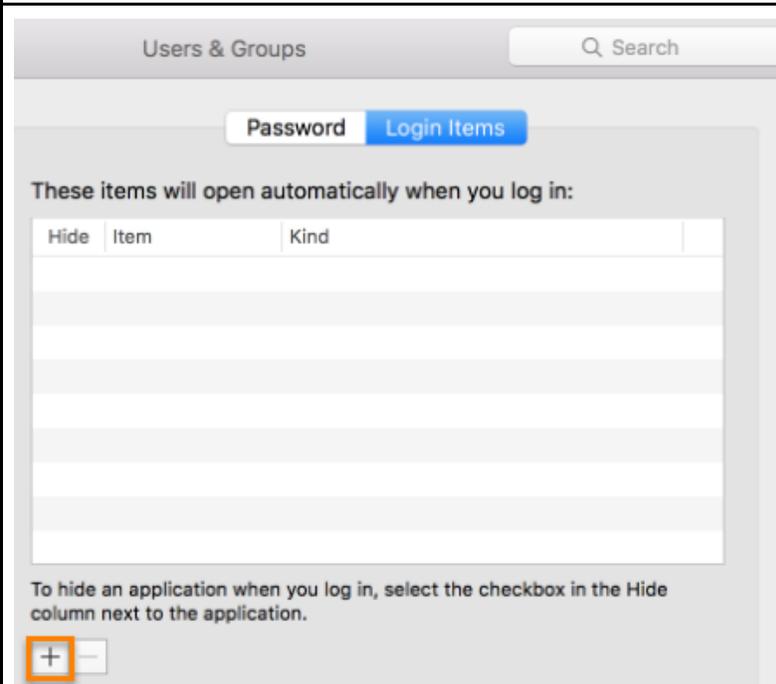

Click on **Users and Groups**

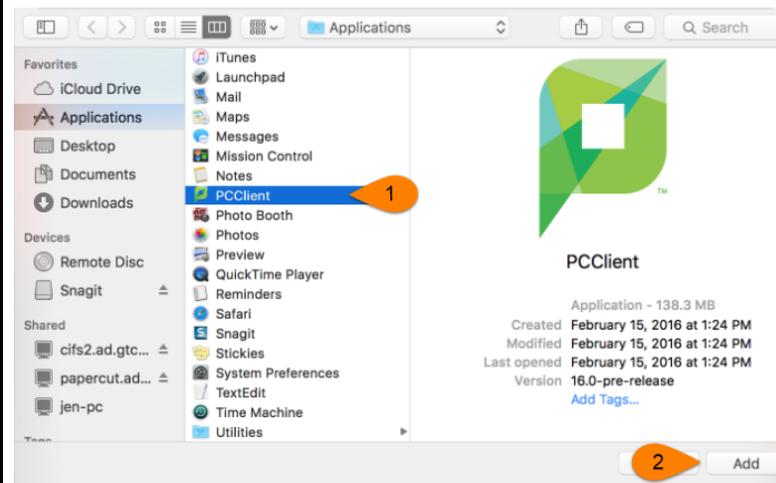

Make sure the user is selected, and click on **Login Items**

Click the + sign

Scroll down to **PCClient**, click it, and click **Add**  
**Note: This will ensure that PCClient runs at login.**

### Adding a PaperCut Printer to Mac OSX

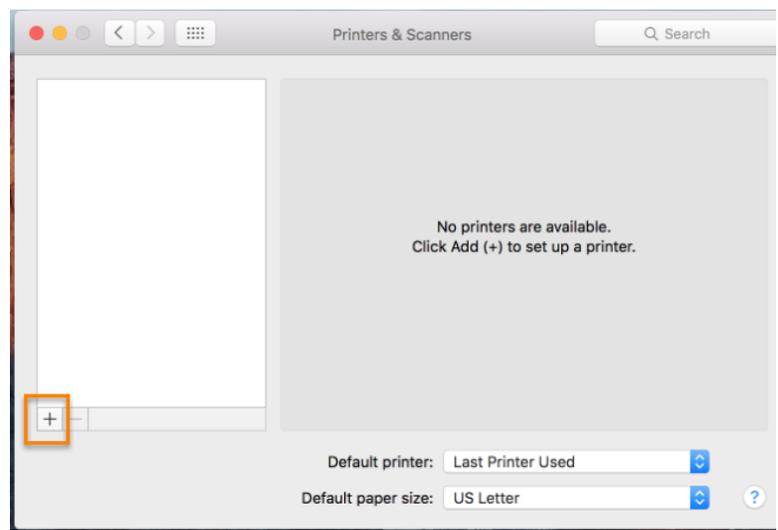

Open **System Preferences**

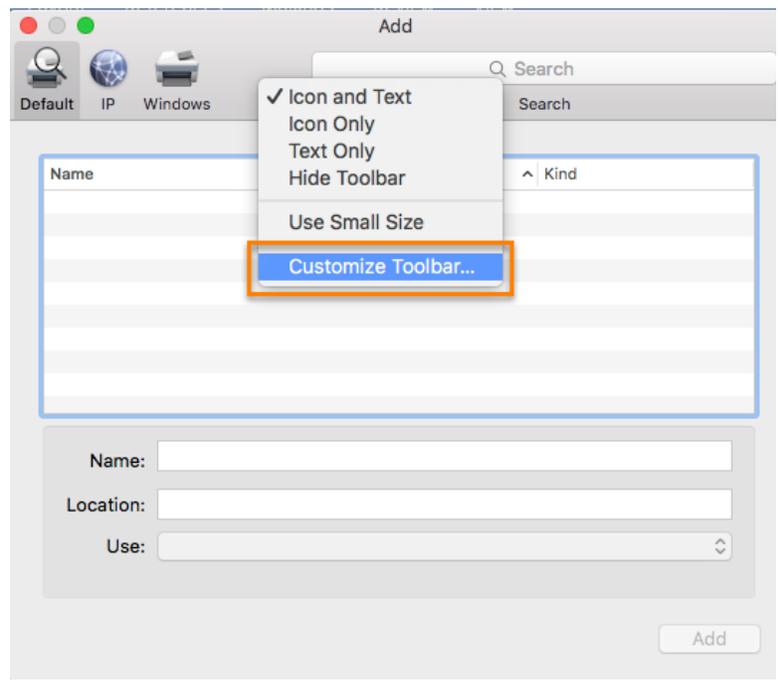

# Click Printers & Scanners

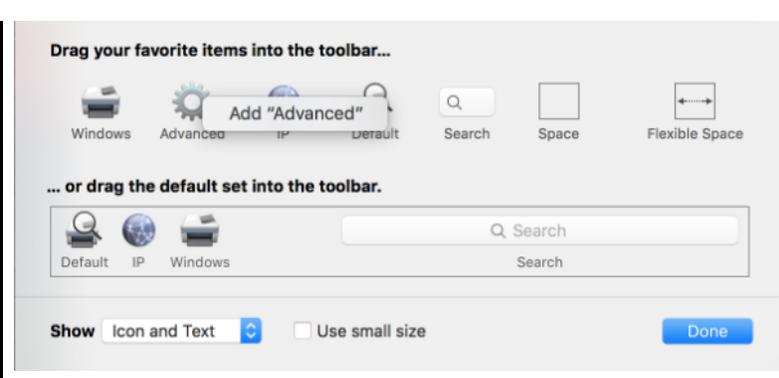

# Click the + sign under Printers

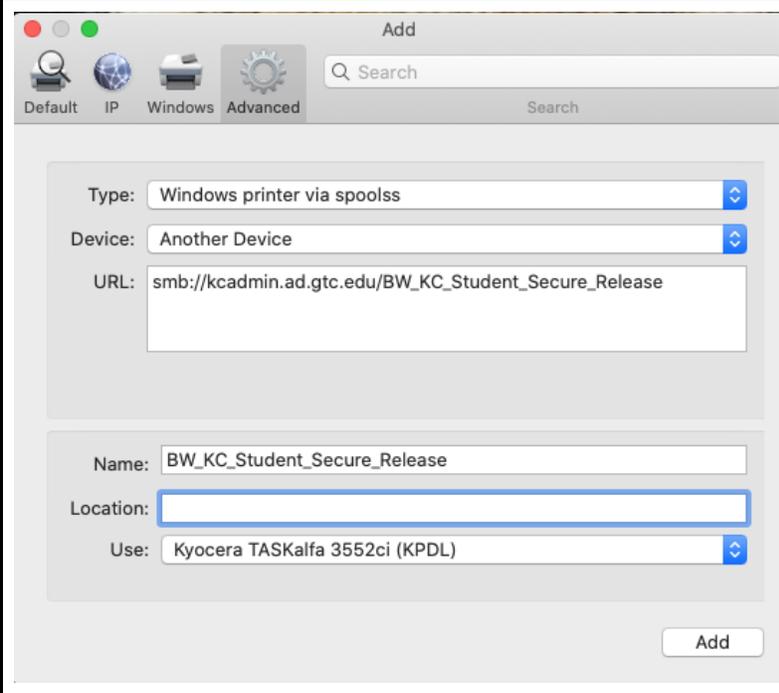

# Control + click the blank space between Windows Printer and the Search Bar, and select Customize Toolbar...

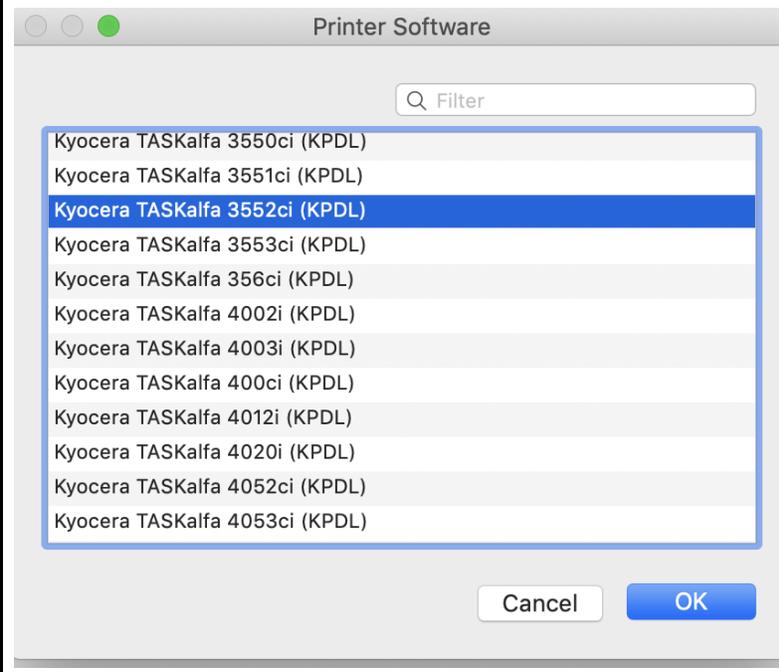

Click **Advanced** and drag it to the gray outline in the toolbar.  
Once completed, click **Done**. **Note: You can also right click Advanced, and select Add "Advanced"**

Click on the **Advanced Gear**  
Once the computer is done searching for printers:  
. Change the **Type** to **Windows printer via spoolss**.  
. Leave **Device:** as is  
. In **URL**, type in **smb://kadmin.ad.gtc.edu/NameOfPrinter**  
**Note: NameOfPrinter** is the name of the printer when you browse for printers in **Windows**. **THIS MUST BE TYPED IN EXACTLY!** (Example: **BW\_KC\_Student\_Secure\_Release**)  
. **Name:** copy the name of the printer, and paste it there.  
. **Location:** can be left blank  
. Click on **Choose a Driver...** next to **Use:**, and select **select Software**

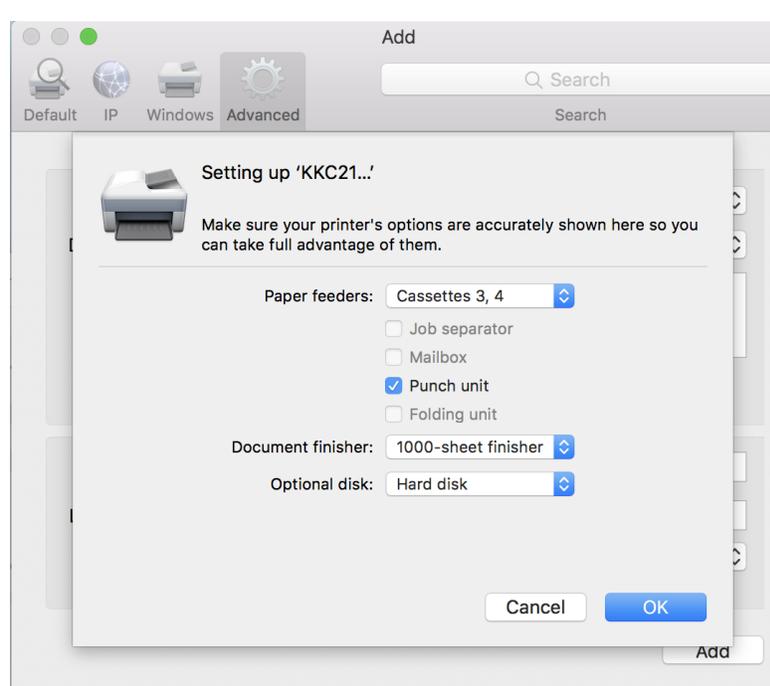

Navigate the list of drivers, and select the one that reflects the printer you are currently installing. (Example: **Kyocera TASKalfa 3552ci (KPDL)**)

Select the options that the printer has.

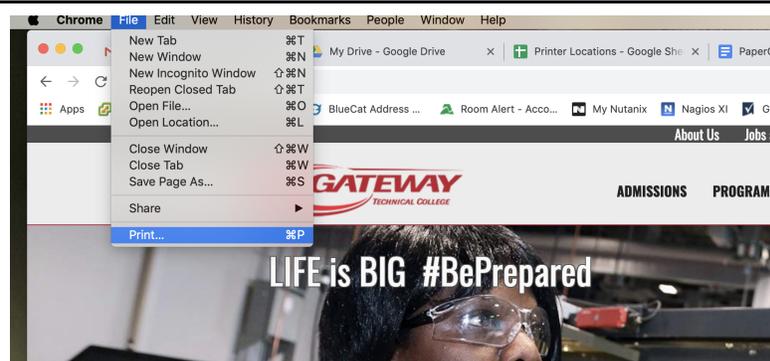

1. **Paper Feeders:** Select **Cassettes 3,4.**
2. **Document Finisher:** Select **1000-sheet finisher.**
3. **Punch Unit:** Check Punch unit
4. **Optional disk:** Hard disk should already be selected.
5. Once the options have been selected click **OK**

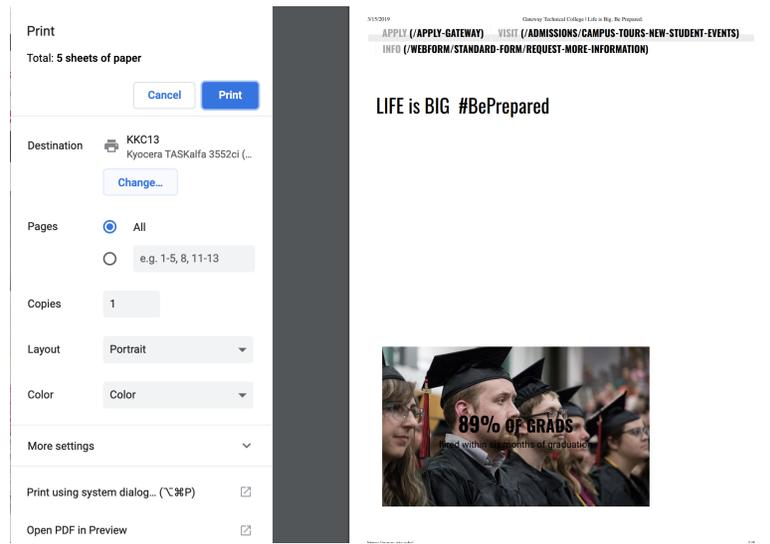

## Students Printing Steps

Depending on what will be needing to be printed these steps may be slightly different per application.

You will then select **Print**.

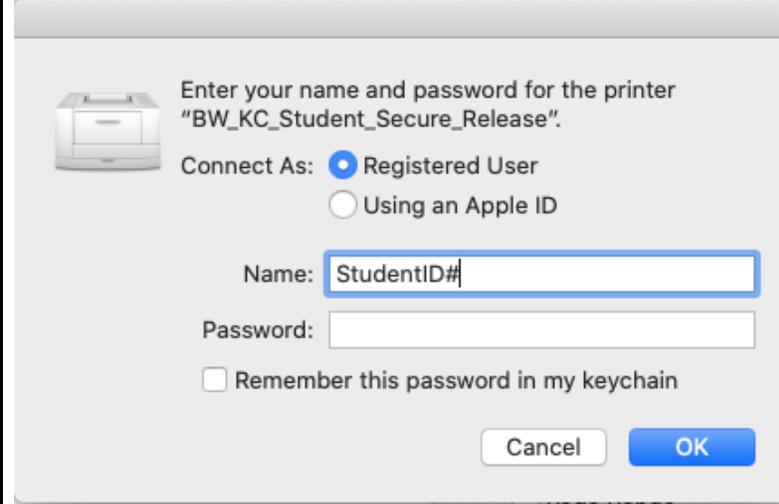

The **Print** dialog window will then open -- Click **Print**

**Note:** This will bring up the window where you will enter our StudentID#, and password.

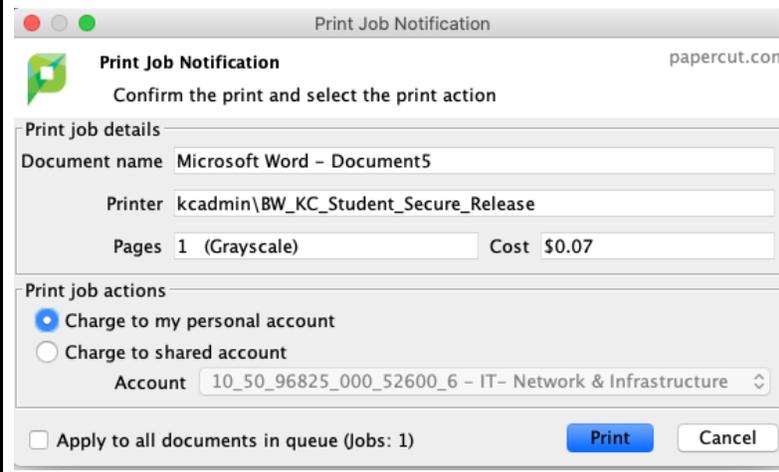

You will now enter your **StudentID#**, and **Password**. Now lick **OK**.

**Warning:** Do NOT check the box next to “Remember this assword in my keychain.”

1. Make sure to select “Charge to my personal account” (Note: If the student is a casual, or works at Gateway they will select “Charge to shared account”)
2. Click **Print**

Your print job will now be sent to the print, and can be icked up.

This box will pop up and then you can go and release job from printer
