

## 2025-2026 Certificate

**Certificate:**                    **QUALITY CONTROL TECHNICIAN (90-444-2)**

**Credits:**                        **7 Credits**

**Description:**                This certificate will establish measurement skills, techniques and activities that will fulfill an organization’s requirements for quality control. Upon completion of the Quality Control Technician certificate, the student will be able to perform final dimensional or mechanical inspection of parts, components, sub assembles and assembly’s for conformance to drawings and engineering specifications. Students will gain nationally recognized certification in micrometers. calipers, comparators and surface plate layout inspection. Students will also gain familiarity with coordinate measurement machines with an emphasis on geometric dimensioning and tolerancing while performing in processes and first piece inspections.

**Related program:**        CNC Production Technician

The sequence shown is the recommended path to completion. Courses will be scheduled in the terms indicated here.  
All courses should be taken in the order shown to help you stay on track and graduate according to your academic plan.  
Courses in this program may be offered in a variety or combination of formats (for example: in-person, video conferencing, online, etc.).
